## PROJECTS

### Personal portfolio ✉

Overview of my professional and academic information Created using HTML and CSS Hosted in Netlify.

### Form reciver

Built a web application with Hibernate, MySQL, Servlets, and web technologies to process form submissions. Includes an admin panel for managing data and ensuring efficient operations.

### User registration form

I developed a User Registration Form project using JDBC and Servlets for the backend. It allows users to register, login, and logout seamlessly. The application supports full CRUD operations, integrated with an SQL database.

### Continental resto online table booking system

#### Major Project

My team and I developed a user-friendly website for a dining establishment using HTML, CSS, JavaScript, Bootstrap, jQuery, and PHP. The responsive site allows users to browse the menu, discover events, and make online reservations. Features include account creation, booking management, and reservation status checks, enhancing user experience and streamlining processes.
